# Release Notes 2.68 Tuesday, February 16th, 2021

Greetings EasyClocking family! Here are the notes for release 2.68. In this release, we developed a new feature for employees to approve a timecard disclaimer at the moment of timecard approval in the employee portal. We also made a change to our other integrations to execute if the service if unexpectedly stops working. We also fixed a couple of report issues, one Xenio timeclock issue with lunch and breaks. Kindly send us an email with your feedback to products@easyclocking.com. Stay tuned for upcoming updates.

## New Features:

- **Employee timecard disclaimer - Ability to configure a disclaimer for employees to "approve" when approving their timecards:** This feature is a new feature added to the current approval process "Manager and Employee". An employee timecard disclaimer can be configured for employees to accept the moment a user tries to approve their timecard. This new feature is a critical setting, to enable this feature kindly contact our team. Once this feature is enabled, there will a new section under the "Settings - General" tab called "Employee Disclaimer". You can enter a disclaimer that contains up to 1000 characters. Once this disclaimer has been configured the employee will have to approve the disclaimer at the moment the time card is approved.

## Enhancements/Add-ons:

1. **"MYOB" Export enhancement - Ability to export out the earn codes used with Multi-rates feature:** We have extended the ability to use the earn codes configured when using the "Multi-rates" feature to be exported in the MYOB export template.

## Fixed Errors/Bugs:

1. **Time Off - Issue when creating an absence for multiple employees:** Fixed an issue when creating an absence for multiple employees. After saving the absence, the screen would stay loading and it would take a long time for the absence to be created in the system.
