

Release Notes 2.76 - Wednesday, October 27th, 2021

Howdy Easies! Here are the notes for release 2.76. This release was a quick one, we wanted to take care of a small issue in the reports and quickly release this item. Kindly send us an email with your feedback to products@easyclocking.com. Stay tuned for upcoming updates.

Fixed Errors/Bugs:

1. **“Report - Timecard Detailed” - Issue when the “Show Location Timeclock Name” option was used to generate the report:** When running the “Timecard Detailed” report with the option to show the location timeclock name, the report did not provide the correct time clock name when it was a password/pin based punch. Corrected this error and now it is providing the correct details.
